Introduction

What is XDX Chain?

XDChain redefines the way we interact with blockchain transactions by offering an ultra-fast, low-cost platform that integrates traditional finance (FIAT) and decentralized solutions.

Our unique solution is based on **three fundamentals**:

- Speed
- Accessibility
- Interoperability

"Scalability, Speed and Profitability in an Unique Ecosystem"

XDX FUNDAMENTALS

Unmatched Speed

XDX Chain guarantees confirmation times less than **1 second**

- Improves the overall user experience.

Reduced Transaction Costs

XDX offers **significantly lower** rates than its competitors.

- It allows businesses to increase profitability.

Interoperability and Connectivity

Our **interchain bridge** technology allows users to move assets between **different blockchains**.

- This creates a fluid transaction environment that opens up endless opportunities and collaborations.

XDX Chain becomes a key component of the global blockchain ecosystem by increasing the adoption of Web 3 technology among developers.

We attach the comparative table with various Blockchains at the end of the presentation

"Scalability, Speed and Profitability in an Unique Ecosystem"

Main Components:

- **Decentralized Exchange (DEX) - Defi**
Platform for staking, farming and swaps.
- **Centralized Exchange (CEX) - Wallet**
 - Fiat/Fiat, Fiat/Crypto, Crypto/Crypto, Crypto/Fiat
 - **P2P System**
- - **Spot and Futures** Market
- **Ultra-fast Blockchain**
(based on Hyperledger Besu).
- **Proof of Stake (PoS) Consensus**
(for scalability and low power consumption).

Differentiator:

- Full compatibility with Ethereum Virtual Machine (EVM).
- Bridge for interoperability with EVM (Ethereum, Binance Smart Chain, Tron, Polygon, etc.)

Process more than 200 FIAT Payment Options

Own custody UTXO (Bitcoin & Fork)

Own custody EVM compatible

- **WE DO NOT PAY COMMISSIONS TO THIRD PARTIES, WE EARN THOSE COMMISSIONS**

Comparable Market Leaders

Fireblocks

8 Billion USD Valuation

Fireblocks positions itself as a leader in cryptocurrency security, making it a preferred option for banks and investment funds.

ChainUp

Industry Unicorn

ChainUp aims to help businesses enter the blockchain space by offering ready-to-use technology, avoiding the need to build systems from scratch.

Other Blockchains pay to them to Custody Assets

XDX Chain joins advantages of both companies and improves their weaknesses

How Do We Make Money?

1. Transaction Fees (Gas Fees)

Every transaction in the XDX Ecosystem generates gas fees that represent constant revenue.

Volume = + Transactions = + Revenue

XDX ecosystem offers more than 10 types of transactions, here are the main 5:

- Token Transfers
- Transactions on the Exchanges
- Staking Tokens
- Farming - DeFi
- Asset Interoperability

Attach you find the complete list of transaction types

2. Transaction Validation Rewards

All transactions and activities within the ecosystem are subject to verification by Verifier Nodes.

For each validation, passive income is generated in XDX Coins

Nodes are terminals that validate transactions and maintain the integrity of the XDX Chain and receive rewards in XDX Coin for each validation.

How Do We Make Money?

3. XDX Coin Value Increase:

Increased use of XDX for transactions will increase its value, and a coin burning programmed model will reduce supply and increase demand.

We attach the summary XDX Coin Tokenomics that includes how we protect it from abrupt movements and the prices for the different stages of public pre-sale.

Private investor benefits

Percentage of net profit

Of every transaction in each monetization model.

NODES (validators)

Increase your earnings per XDX transaction and allocation.

XDX Coins

XDX Coins are allocated with a price 40% inferior to the first Public Presale.

Priority Staking

Up to 50% APY for the first 6 months.

Equity over the company.

You will receive up to 15% equity.

Prominent **role** in ecosystem governance, with preferential voting in key decisions.

7 Year Expansion Plan

Phase 1 (2024–2025):

Base infrastructure development (Mainnet, Testnet, DeFi, bridge and hybrid exchange).

Phase 2 (2025–2027):

Regional expansion and strategic alliances (listings on exchanges such as Binance and Coinbase, alliances with DeFi and NFT projects).

Phase 3 (2028–2030):

Global adoption with integration in financial institutions and cross-chain solutions.

Marketing and Community Strategies

Mass Adoption:

- Airdrops and rewards for early adopters.
- Hackathons for developers and educational programs.

Alliances with Global PR and Marketing Agencies expert in the industry

Global Expansion:

- Alliances with communities on Discord, Telegram and Twitter.
- Sponsored events at blockchain conferences.
